Skills#EU - Learning Mobility - Opening European Minds

The program ERASMUS + provides mobility opportunities for young people helping them gain essential skills for their personal and professional development. The project idea of Skills#EU uses the existing enthusiasm of the trainees abroad to equip them with the necessary skills to activate their European citizenship.

The overall aim of Skills#EU is to develop and pilot a blended-learning training programme for young trainees that accompanies them before, during and after their mobility experience. It equips them with the means to develop key competences, and to fulfil their educational potential in the field of social and civic competences, cultural awareness and expression. Five

organisations, from Germany, Austria, France, Malta and UK, bring together their expertise in different fields such as youth work, vocational training, language and intercultural preparation. Trainers will also benefit from the results of the project as they will be able to access and use lots of learning resources. All project materials, as well as guidelines referring to the respective methodologies, are to be found gradually on the projects' website.

Are you interested in sharing your experiences or actively engaging yourself in the project? Please follow the activities on our website and on Facebook or directly contact us.
